

# Financial Planning

[compiled from prassana chandra]

Ram Kumar Kakani

# Financial Planning

- Vision, mission, etc. guide a firm's performance and financial planning
  - Financial Forecasts (using trends)
  - Financial Projections (also includes expansion/changes)
  - So, one has to take care of industry-level factors, business-level factors, and firm-level factors
- 

# Usual Steps

- Assumptions (usually economic in nature)
- Sales Forecast
  - Qualitative Techniques (ITC)
  - Time Series Projection Methods (Cement)
  - Causal Models, Regressions (Alcoa)
- Pro Forma Financial Statements
  - Percent of Sales Method
  - Budgeted Method
  - Combination Method
- Asset Requirements
- Financing Plan

# Percent of Sales Method

TABLE 12.1

## General Income Statement Format

Sales revenue
Less: Cost of goods sold
<hr/>
Gross profits
Less: Operating expenses
<hr/>
Earnings before interest and taxes (EBIT)
Less: Interest
<hr/>
Net profits before taxes
Less: Taxes
<hr/>
Net profits after taxes
Less: Preferred stock dividends
<hr/>
Earnings available for common stockholders
Earnings per share (EPS)

# KP Common Size Income Statement

	Regular (lakhs of Rs.)			Common-Size (%)		
	2001	2002	2003	2001	2002	2003
<b>Net Sales</b>	<b>1,235</b>	<b>2,106</b>	<b>2,211</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>
<b>COGS</b>	<b>849</b>	<b>1,501</b>	<b>1,599</b>	<b>68.7</b>	<b>71.3</b>	<b>72.3</b>
<b>Gross Profit</b>	<b>386</b>	<b>605</b>	<b>612</b>	<b>31.3</b>	<b>28.7</b>	<b>27.7</b>
<b>Adm.</b>	<b>180</b>	<b>383</b>	<b>402</b>	<b>14.6</b>	<b>18.2</b>	<b>18.2</b>
<b>EBIT</b>	<b>206</b>	<b>222</b>	<b>210</b>	<b>16.7</b>	<b>10.5</b>	<b>9.5</b>
<b>Int Exp</b>	<b>20</b>	<b>51</b>	<b>59</b>	<b>1.6</b>	<b>2.4</b>	<b>2.7</b>
<b>EBT</b>	<b>186</b>	<b>171</b>	<b>151</b>	<b>15.1</b>	<b>8.1</b>	<b>6.8</b>
<b>EAT</b>	<b>112</b>	<b>103</b>	<b>91</b>	<b>9.1</b>	<b>4.9</b>	<b>4.1</b>
<b>Cash Div</b>	<b>50</b>	<b>50</b>	<b>50</b>	<b>4.0</b>	<b>2.4</b>	<b>2.3</b>

What are we assuming here?

# KP Common Size Balance Sheets

Assets	Regular (lakhs of Rs)			Common-Size (%)		
	2001	2002	2003	2001	2002	2003
Cash	148	100	90	12.10	4.89	4.15
AR	283	410	394	23.14	20.06	18.17

# Combination method in Income statement

- How should we take the proportions – last years or 2/3-years average?
- Percent-to-Sales Method can be used in items such as cost of goods sold, and selling expenses
- Budgeted Method can be used in items such as depreciation, general and administration expenses, and interest on debentures
- While items such as dividends and retained earnings will be based on managerial policy/decisions
- Use budgeted method for items having a structural change in the markets (example, managerial labour markets)

# Combination method in a Balance Sheet statement

- Percent-to-Sales Method can be used in most asset-side items except 'investments' and 'miscellaneous expenses' [you can estimate them]. It can also be used for finding values in 'CL & P'
- Update the 'reserves and surplus' values using your P&L statement estimates
- Other values could be tentatively set as equal to previous levels (unless you have prior info)
- The difference in 'total assets' and 'total liabilities' will give an estimate of the amount of external funds required or surplus funds available

# When assumptions are not there?

- There is a circularity problem in preparing pro forma statements
- We assumed that the ratios of assets and liabilities to sales remain constant over time
- It means there is a linear relationship
  - Economies of scale (inventory)
  - Curvilinear ratios (inventory)
  - Lumpy assets (say, fixed assets)
- Forecasting errors and excess assets
- Computerized financial planning systems
